Middle-level CTE Learning Experience Title: Medical Inventions

Length of Lesson: 6 days (40 minute periods)

Grade Level: 6-8

CTE Area: Health Sciences

CTE Theme: Problem Solving and Innovation

CTE Content: Communication and Client Interaction

Date Created: 8/27/2019

PLANNING	
Curriculum Goal	Students identify medical inventions that have had an impact on human life. Students research information on how the invention was developed and what desirable and undesirable impacts it created. Students create a brochure and presentation that includes multiple information sources.
Essential Question(s)	What knowledge and skills are necessary to demonstrate introductory understanding of the application of problem-solving processes and the acquisition, evaluation, and application of the products of research for informed decision making?
National Standards	Common Career Technical Core Standards

view in the next class.

Day 5

Teacher provides an opportunity for all groups to present their innovation via their brochure and allows other groups an opportunity to ask questions about the innovation.

Teacher provides students with the Innovation Reflection form (attached).
Teacher emphasizes how each innovation may change the way healthcare workers interact with their clients.

Day 6 (Closure)

Teacher reviews the ten innovations, their pros/cons and the way the innovation could impact communication and client care.

Teacher asks students to share their thoughts on the future of healthcare, based on the information learned.

Day 5
Groups of students present the information on

Performance Measure	Exemplary	Proficient	Developing	Beginning
Analyzes Career Opportunities	Analyzes career opportunities to determine requirements and compare effectively with personal strengths and skills to identify matches and gaps.	Analyzes career opportunities to determine requirement and compare effectively with personal strengths and skills.	Identifies career opportunities to determine requirements.	

information.
