# Increase Access to Higher Education

---

HEOP provides financial assistance, pre-freshman summer programs,

# Increase Access to Higher Education

---

STEP provides academic enrichment in science and mathematics with the purpose of increasing the number of historically underrepresented and economically disadvantaged middle and high school students prepared to enter college and improving their participation rate in mathematics, science, technology, related fields, and the licensed professions. STEP serves over 11,000 students through 59 programs.

SED requests an \_\_\_\_\_  
in STEP funds to provide existing  
programs the opportunity to serve  
additional students and increase the  
number of projects supporting  
student participation in STEP  
research, internships, or exploratory  
career opportunities.

# Increase Access to Higher Education

---

CSTEP provides academic enrichment and research experience in STEM content areas to increase the number of historically underrepresented and economically disadvantaged undergraduate and graduate students who complete programs of study that lead to professional licensure and careers in mathematics, science, technology, and health related careers. CSTEP currently serves over 7,400 students through 55 programs.

# Increase Access to Higher Education

---

LPPs are partnerships between institutions of higher education, schools and community organizations that offer comprehensive college/dropout prevention programs to middle and high school students. LPPs provide tutoring, counseling, college and career exploration, crisis intervention and other supportive services to 14,790 students in 47 programs across New York State.

LPP has demonstrated value in positively impacting youth at risk of dropping out of

SED requests an \_\_\_\_\_  
to fully fund one partially funded  
institution and enhance services in  
existing projects.

# Increase Access to Higher Education

---

Providing undocumented college students with the opportunity to participate in the State's Tuition Assistance Program and other state financial assistance and aid has long been a priority of the Board of Regents.

We applaud Assembly Speaker Carl Heastie and Senate Majority Leader Andrew Stewart Cousins and their respective conferences for making this a top priority in this legislative session, working to get this significant legislation through their respective

In New York, thousands of undocumented students receive education through the state's P-12 public school system.

The Dream Act gives our undocumented students the opportunity to access higher education by making state financial aid available to them.

Our economic growth depends on a vibrant and educated workforce.

# Bridge to College and Careers Pilot Program

---

Bridge programs enable ~~of~~ school youth and adults to obtain critical basic skills, a high school equivalency diploma, and industry-recognized credentials.

The Department \_\_\_\_\_  
\_\_\_\_\_ to create a Bridge to College and Career Pilot Program consisting of partnerships between adult education programs and college or training providers in each of the seven Regional Adult Education Networks of the state.

These programs would include:

- Career exploration and career assessment;
- Relationships with employers and colleges; and
- Apprenticeships and internships.

# Increase Access to Higher Education

---

SED requests an \_\_\_\_\_ to provide much needed enhanced supports and services to over 73,000 identified students with disabilities York State degree granting colleges and universities.

Funding would be authorized, for one or more of the following purposes:

- to supplement funding for supports and accommodations of students with disabilities;
- to support summer college preparation programs to assist individuals with disabilities transition to college, and prepare them to navigate campus facilities and systems;
- to provide full and part-time faculty and staff with disability training; and
- to improve the identification process of individuals with disabilities and enhance data collection capabilities.

# Licensed Professionals Serve and Protect the

---

Licensing is inextricably linked to education.

The professions are at the core of the state's economy.

Licensees must be qualified and competent to provide health, design, or business services. Professional practice affects all New Yorkers.

Hundreds of thousands of practice interpretations and clarifications.

Investigations and prosecutions across the state

Implementation of Illegal Practice Enforcement

---

# OP Modernization:

---

A project plan has been developed to replace our antiquated computer system with a robust customer electronic licensing system, which will include enhancements to the customer experience and improvements to backoffice processes, over the next 5 years.

Online applications for RNs, LPNS, OTs and more than 20 other professions have been rolled out since late 2016. Applicants are now able to submit

---

Eliminates the limited license for clinical laboratory personnel, which sunsets every few years, and creates a permanent provisional permit provision that will allow a clinical laboratory license applicant to work under supervision, pending the completion of educational and exam requirements.

Authorizes nurse practitioners to witness the patient's execution of a health care proxy; to act as a person's health care agent; and determine that a patient lacks capacity.

Authorizes registered pharmacy interns who have received approved training and certification, to administer immunizations under the immediate personal supervision of a licensed pharmacist.

Provides a process under which hospitals may issue standing orders, departmental or non-patient specific orders, that authorize attending nurses to provide services and care to healthy members of the community.

# Build Technical Assistance and Support Capacity

---

Since 2011, state budgets have included new educational programs for SED has received no additional state support.

As districts and higher education institutions are faced with implementing these various programs, they rely more and more on the technical support expertise of the Department.

It is common in federal programs for the administering agency to be allowed 5% set aside from grant awards to allow for proper oversight of the program.
